

22 NOV 1983

MEMORANDUM FOR: Deputy Director of Personnel

FROM:

Chief, Position Management and Compensation Division

SUBJECT: Administratively Uncontrollable Overtime for  
Office of Technical Service

1. As we discussed on 21 November, D/Pers granted two separate blanket approvals to Office of Technical Service (OTS) for use of premium pay for administratively uncontrollable overtime. The first, approved on 27 June 1983, was for Technical Operations Officers stationed overseas. In this case, the approval was a revalidation of an earlier approval for which OTS had submitted the required information to obtain approval. Furthermore, sufficient data was available within PMCD to validate the inherent continuing, uncontrollable overtime requirements for Technical Operations Officer positions. (C)

2. The second case, approved on 18 July 1983, applied to the Special Activities Division and the  both of which are charged with providing continuing technical support to Central American and South American operations. Again, ample data was available within PMCD to develop the specifics necessary to recommend approval of the OTS request to D/Pers. (C)

3. Chief, OTS Personnel was advised after approval of the above cases that future requests should include information required by  to assure that no delays are encountered in the approval process because sufficient information was not available. (U)
